

2016 Released Items: Grade 7 Research Simulation Task

The Research Simulation Task requires students to analyze an informational topic through several articles or multimedia stimuli. Students read and respond to a series of questions and synthesize information from multiple sources in order to write an analytic essay.

Due to item bank considerations, grade 7 will not be releasing the Research Simulation Task sample student responses in 2016. Please see examples from 2015 or reference an adjacent grade.
